# DOOR

## segreta

**SEGRETA COLLECTION'S DOORS** represent the ideal product for those looking for high quality flush-to-the-wall doors. Our range includes swing, pivot and sliding versions.

**THERE ARE SPECIAL DOUBLE-FLUSH VERSIONS**, the exclusive coplanar handles designed specifically for the Segreta collection and the innovative XDoor® model with LED lighting integrated into the panel.

SEGRETA

MDF with finishing performed on site | QUADRA

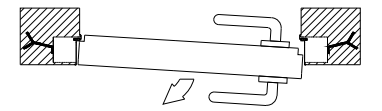

# HINGED SEGRETA

Segreta is available with push and pull opening. It is made with a sturdy 53 mm thick door, while the extruded aluminum frame allows it to be mounted flush with the wall on plaster-board or masonry walls.

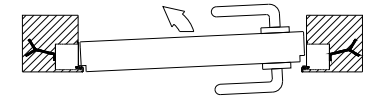

The Segrata door can also be made to measure, up to 300 cm in height.

To ensure the best quality, on doors with a height of more than 210 cm, an extruded aluminum reinforcement is inserted, hidden inside the honeycomb door, this type of construction of ours ensures maximum flatness of the door.

Pull version

Push version

## FRAME'S PROTECTIVE FILM

The door frame is made of extruded aluminum already anodized and finished in satin silver.

The anodizing process, in addition to protecting the aluminum from corrosion, does not require the whitening of the frame which is already finished. To preserve its aesthetics, during the construction phases, an optional protective film may be required to be removed at the end of the work.

Optional anodized finishes are available on request, such as bronze or dark bronze, or paints in opaque colors of your choice.

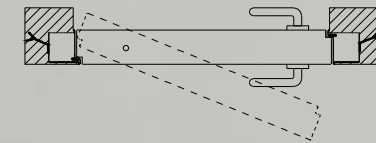

## FRAME ALREADY ASSEMBLED

To facilitate installation and save time on site, the door frame arrives at its destination already assembled, ready for fixing.

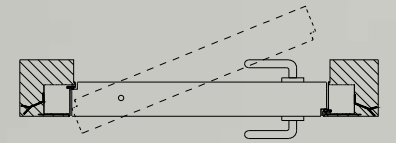

# SEGRETA PIVOT

The pivot version is realized on measure until cm 130 x 300h, it can be accessorized with an optional soft-closing system.  
On request, are available various optional invisible handle's type, as the MA 13 handle in this photo.

Pull version

Push version

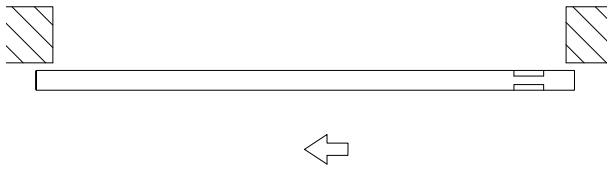

SEGRETA

MDF with finishing performed on site | MA 13

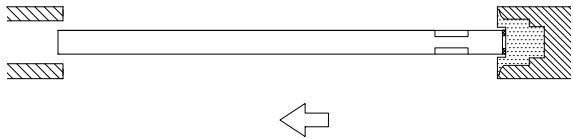

# EXTERNAL WALL SLIDING DOOR

The external wall's sliding door can be realized with 1 or more panels. It is always realized on measure until cm 130 x 300 h, already varnished, or in the version to be varnished. The sliding track can be of the built-in type, or in the classic version with cover valances. Also for the sliding Segreta, various types of optional retractable handles are available, such as the MA 15 handle model in the photo.

# INTERNAL WALL SLIDING DOOR

The Segreta door is available in internal wall's sliding version and is compatible with all models of counterframes on the market. The company can provide the complete door and subframe kit, or only the pre-arranged door.  
Internal wall's sliding Segreta is equipped with satin chrome (as in the photo) or matt white built-in handles; other types of invisible handles are available on request.

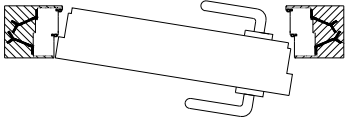

SEGRETA  
MDF with finishing performed on site | MA 15

# DOUBLE FLUSH-TO-WALL SEGRETA DOOR

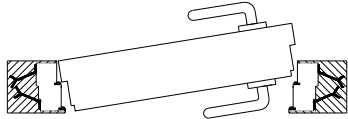

Double flush-to-the-wall Segreta door remains perfectly coplanar to the wall on both sides, both the frame and the door, are available in three different thicknesses: 102 mm, 107 mm and 125 mm.

On request, double flush-to-the-wall doors in customized thickness can be produced, according to the customer's needs.

Pull version

Push version

# XDOOR<sup>®</sup>

The XDoor is characterized by the presence of a LED lighting system integrated into the thickness of the door.

The light comes out of a slot inside the MA23 groove handle, the closure is entrusted to an adjustable magnet which can also be equipped with an optional privacy lock.

The XDoor<sup>®</sup> is a registered model, produced exclusively by Staino&Staino.

The low consumption LED light can be adjusted in its intensity by means of an optional dimmer control; the system can be connected to a simple switch or to any home automation system present in the home.

XDOOR<sup>®</sup>  
MDF with finishing performed on site | MA 23 LED

## THE DOOR WITH INTEGRATED LIGHT

The XDoor<sup>®</sup> is available in hinged, pivot and sliding version; made on measure until cm 130 x 300 h.

The panel can be required with a protective base finish to be varnished as the wall, or already lacquered with any matt color on request.

# PHOTOS FROM OUR COSTUMERS

**SEGRETA**  
MDF with finishing performed on site | Square chrome handle

## CONTINUE BASEBOARD

Our flush-to-the-wall door allows the installation of baseboard also on the door's panel, both on the push side and on the pull side.  
An aesthetic solution of continuity that makes the door perfectly integrated into the wall.

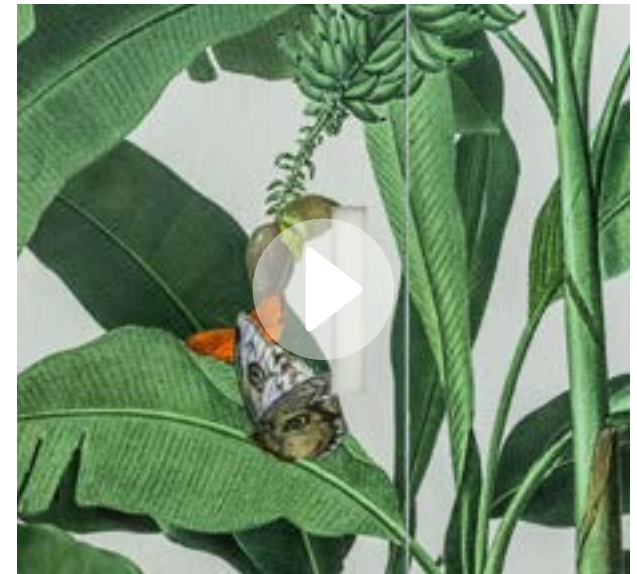

## PERFECT MIMETISM

follow the link to see how MA22  
handle works

## INVISIBLE DOORS AND BRANCHES

The Segreta doors can be combined with our doors for flush-to-the-wall wardrobes.

The panels can be whitewashed or covered with wallpaper, the invisible effect is guaranteed.

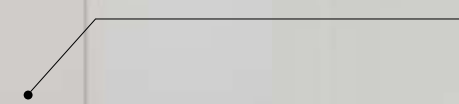

## CUSTOM SEGRETA DOOR

On the push side, our door can be enriched by the customer, with decorative bands like on the walls, the capacity of our hinges (over 90kg) does not fear the additional weight.
