# DOOR

## easy-s

**THE EASY-S SLIDING PANEL SYSTEM** allows the subdivision of interior spaces with doors characterized by a particularly slender perimeter profile, in line with the most rigorous and contemporary architectural projects.

The Easy-s design was developed around two primary needs: the reduced section of the profile, which amplifies the feeling of openness of the spaces and responds to the aesthetic needs of the designers, and the commercial competitiveness, obtained thanks to a particularly rapid manufacturing Interesting.

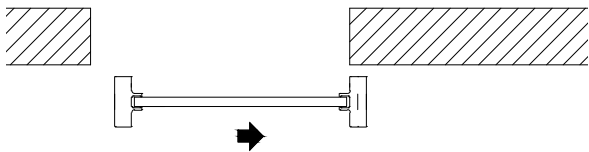

Thanks to the particular design of the profile, Easy-S offers a very light image, resulting in a discreet and elegant presence. The work times for the realization of the doors have been shortened thanks to particular project specifications, with positive consequences in terms of costs and speed of delivery that make Easy-S the entry-level collection of the STAINO & STAINO catalog, a successful mix of design and technical solutions for an attractive product that meets the quality standards of our company. As with the other company collections, the Easy-S system can also be customized in the finishes of the profiles and glass.

# EASY-S SLIDING DOORS

The Easy-S door is made to measure to the millimeter, both in height and in width. The customer can choose from a wide range of finishes for both profile and glass. The sliding tracks can be classic or recessed (as in the photo).

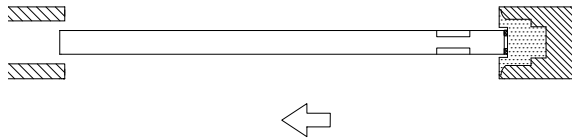

It is possible to communicate with our technicians to evaluate all the design opportunities and create the solution that best suits the customer's needs.

# SLIDING EASY-S FOR BOXES FLUSH TO THE WALL

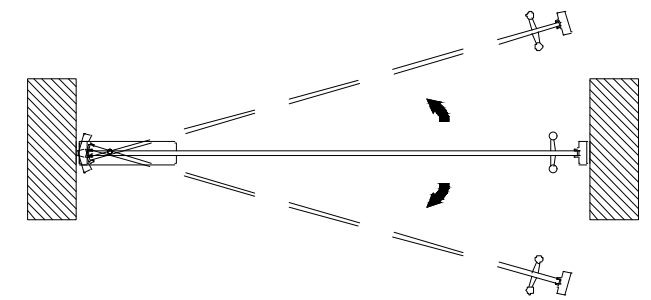

The Easy-S sliding door can be prepared for insertion into sliding boxes that do not require the assembly of the casing, upon customer request, the company can provide both the door and the box.

# EASY-S PIVOT DOORS

The Easy-s door is also available in the pivot version, with integrated soft closing system and stop at  $0 \pm 90^\circ$ , always made to measure both in width and height.

There are decorative crosspieces made with extruded aluminum profiles with a particularly thin section.

## WHITE MILK LAMINATED GLASS

The milky white opal glass guarantees privacy without preventing the diffusion of light.

Particularly easy to clean, it has both glossy sides as the opal surface remains inside the two slabs, joined by the layering process.

It guarantees maximum safety because, in the event of breakage, the glass fragments with a cobweb effect that prevents the glass fragments from falling.

# SMOKED REFLECTIVE GLASS

The reflective glass varies the level of transparency according to the light present, see photos.

For example, when the glass is illuminated only from the outside, the surface appears as reflective / mirrored (photos 1 and 2).

3

However, when light is present on the opposite side, the door changes appearance, becoming almost completely transparent (picture 3 and 4).

THE LEVEL OF TRANSPAR-  
ENCY VARIES ACCORDING TO  
THE **DIFFERENCE IN LIGHT OF**  
THE ENVIRONMENTS THAT  
THE DOOR DIVIDES.

## DESIGN APARTMENT

A large Easy-S sliding door with a special height of 360 cm, aluminum in matt black finish and laminated transparent glass. MA 17 handle, with the same finish as the doors. The horizontal aluminum cross bars measure only 12 x 12 mm. Apartment designed by the architects Mariella Corsi and Laura Bianchi of ARCHBCSTUDIO ([www.archbcstudio.com](http://www.archbcstudio.com))

# CITY HOME DESIGN

A historic town house, where the generous volumes are the only reminder of another era. The complete renovation of the building was designed to make this classic home contemporary.

For the division of the convivial areas, sliding doors from the Easy-S collection were chosen with perimeter profiles and handles in matt black lacquered aluminum, transparent laminated glass in a smoked finish.

Drag sliding system with four tracks, trolleys with amortized closure.

# EASY-S LIVING

In this project, closures were made with pivot doors from the EASY-S collection, profiles in matt black finish and transparent laminated glass in smoked finish, the decorative crosspieces arranged according to the customer's design, are made with horizontal profiles of 20 mm and 10 mm vertical profiles, the MA-17 handles specific for the Easy-S pivot doors are made from solid aluminum and have a finish coordinated with the perimeter profiles.

The Easy-S pivot door that separates the sleeping area from the living room is equipped with optional profiles with telescopic brushes, these thin profiles designed specifically for the Easy-S pivot doors, reduce the contact between the door and the wall, and also allow compensate for the thickness of the floor skirting.

# SOFT CLOSE CLOSURE

The soft close system slows the door down during the closing phase and gently stops the door in the 0 ° position, while opening a stop is integrated that allows the door to stop just beyond 90 °. Both the 90 ° stop and the slowdown of the door work in both opening directions.

The soft close integrated system is standard on Easy-S pivot doors, no need for floor or ceiling cut-outs because all the operating components are integrated into the door profiles.

**EASY-S**  
**PA03** | clear fumé glass **CR05** | **MA 17** | crosspieces **THREE**

#### MA17 handle

The MA17 handle, standard on the Easy-S door, is made from solid aluminum and painted in a finish coordinated with the door profiles. In the photo, an optional iron gray material finish.

#### Wall uprights detail

With the optional wall uprights, a better closure is obtained between the door and the wall, even in the presence of skirting boards (as in the photo). The best insulation is especially appreciated in the kitchen.

## A GREEN SOUL

### SEE THE PROJECT

click on our link, you will be redirected to the [stainoestaino.it](https://stainoestaino.it) site

Easy-S sliding doors are made exclusively of aluminum and glass, eco-sustainable materials par excellence.

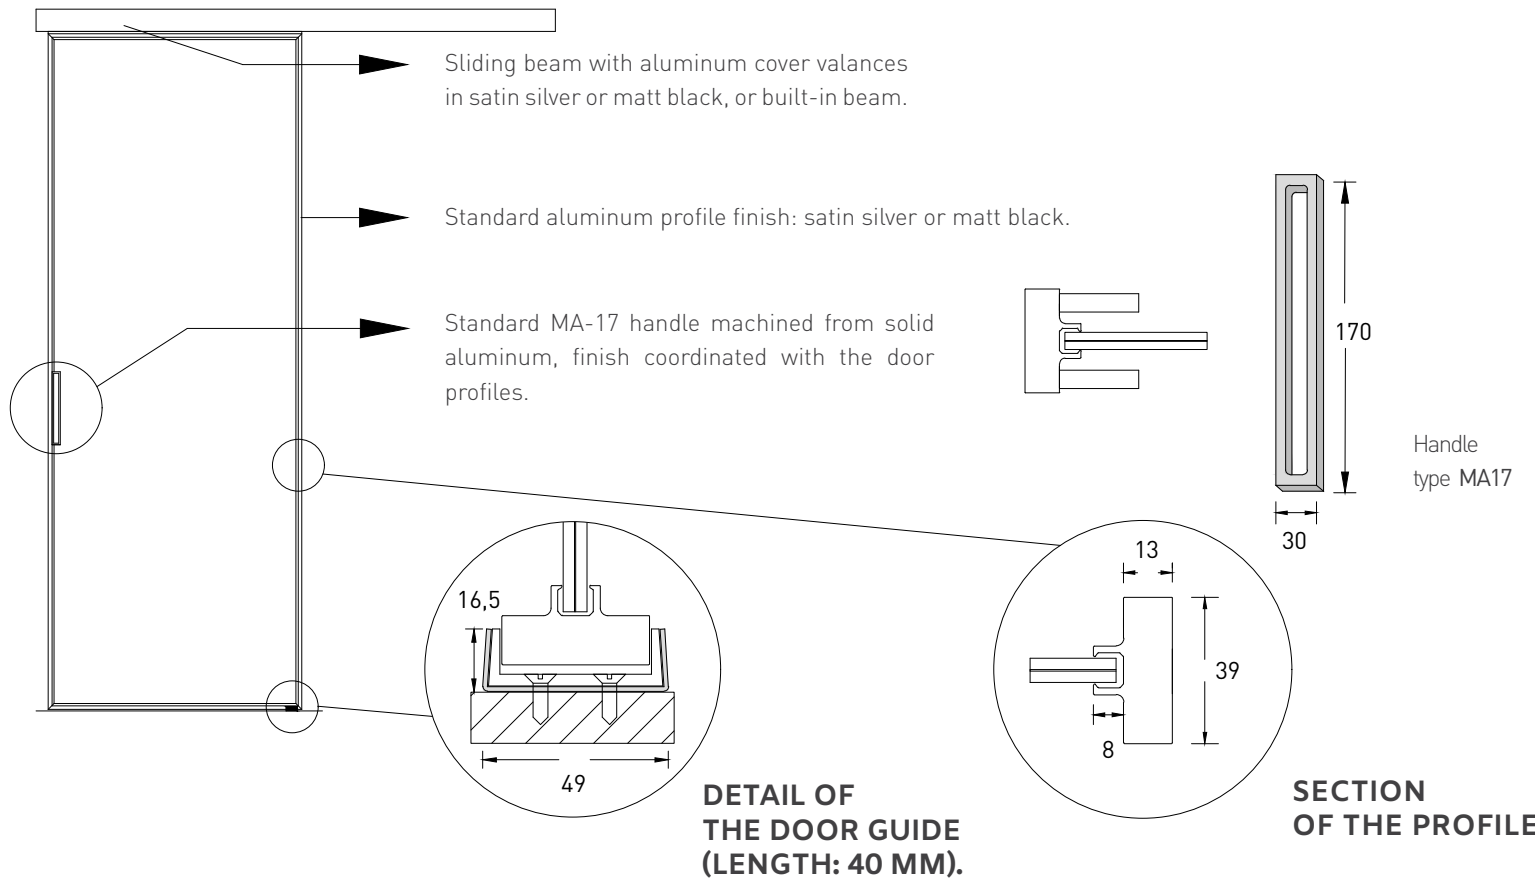

During the production phases, all processing waste is entirely recovered to be recycled. In fact, the production of Easy-S doors does not generate any waste. This feature combined with the very long life of all the materials used makes the Easy-S product a reference in Green building projects.

Project by Arch. Letizia Antonia Lerro specialist in Bio-building and Geobiology ([letizia.lerro@gmail.com](mailto:letizia.lerro@gmail.com))

## SLIDING EASY-S

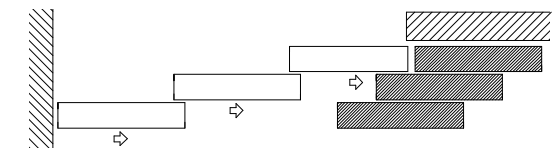

## SLIDING OPENINGS\*

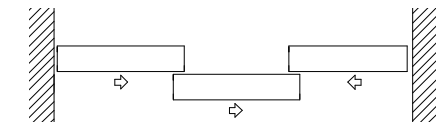

Sliding door with single rail, wall or ceiling attachment.  
Also available in built-in version.

Double-panel door, two-way sliding beam with ceiling attachment. Also available in built-in version.

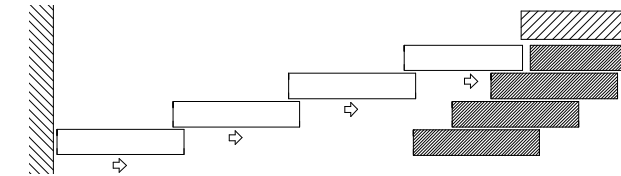

Three-panel door, three-way sliding beam with ceiling attachment. Also available in built-in version.

Three-panel door with two-way sliding beam with ceiling attachment. Also available in built-in version.

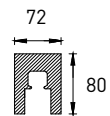

Four-panel door, two-way sliding beam with ceiling attachment. Also available in built-in version.

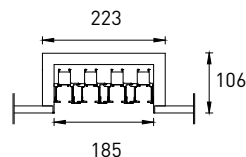

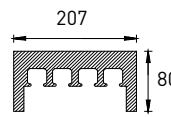

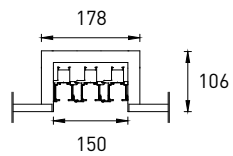

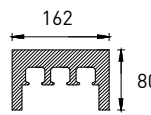

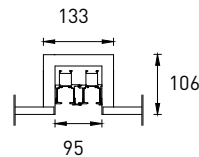

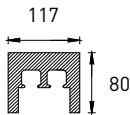

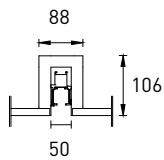

Four-panel door, four-way sliding beam with ceiling attachment. Also available in built-in version.

Beams with valance

Adjustable recessed beams

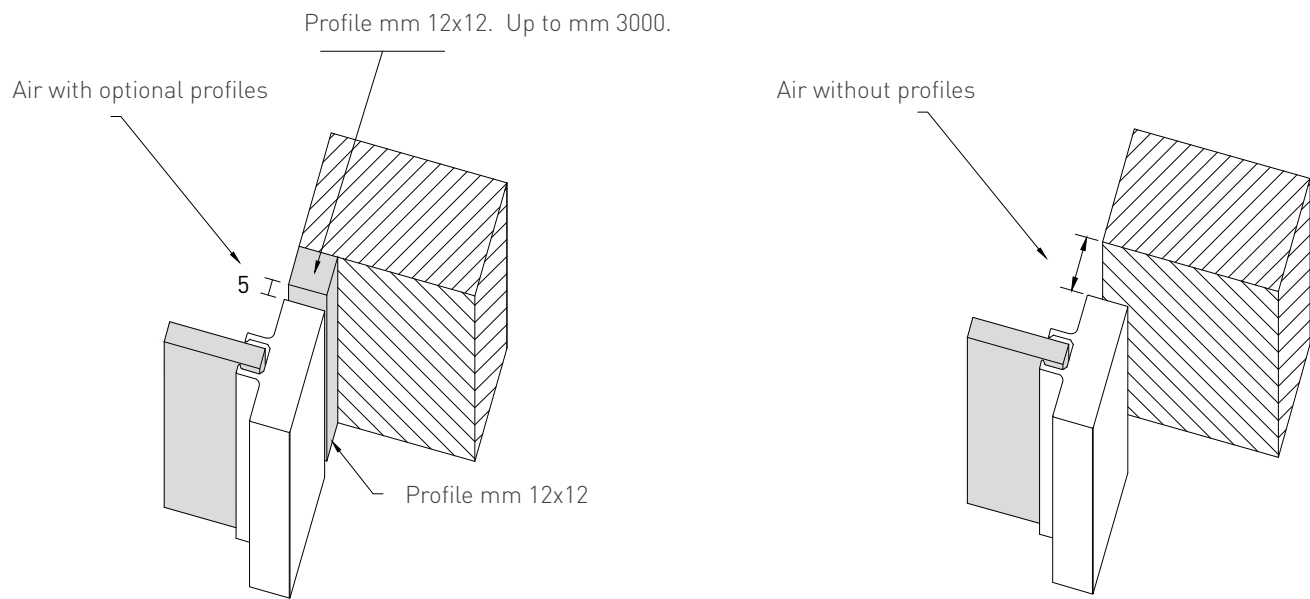

\*examples of sliding openings based on the number of doors. It is possible, on request, to create other types of opening.

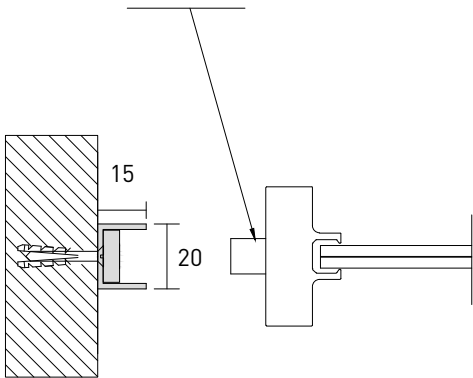

WALL PROFILE FOR AIR REDUCTION:

A 12 x 12 mm section profile can be installed on the wall to reduce the air between the door and the wall.

WALL UPRIGHT :

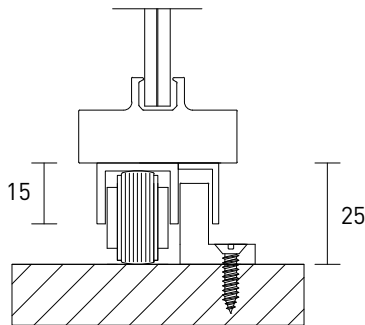

Optional wall stop upright, includes 10x10mm check profile ad-ded to the door

Both the upright against the wall and the striker profile are made of aluminum coordinated with the door.

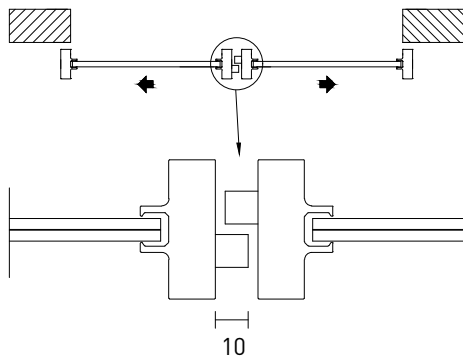

OPTIONAL FLOOR WHEEL:

The floor wheel has the purpose of increasing the sta-bility of the door, it must only be used in the presence of smooth floors without joints, such as parquet or resin.

CENTRAL CLOSING UPRIGHT :

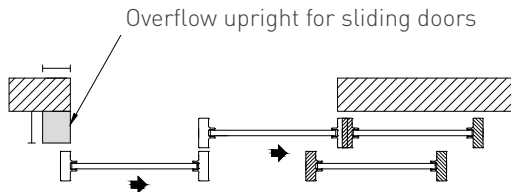

Central closing upright for double-door, consisting of a 10x10mm check profile on each door

The central meeting upright allows to eliminate the light between the doors even in the case of out of plumb.

ACCESSORIES FOR SLIDING DOORS:

The drag kit includes the optional floor wheel.

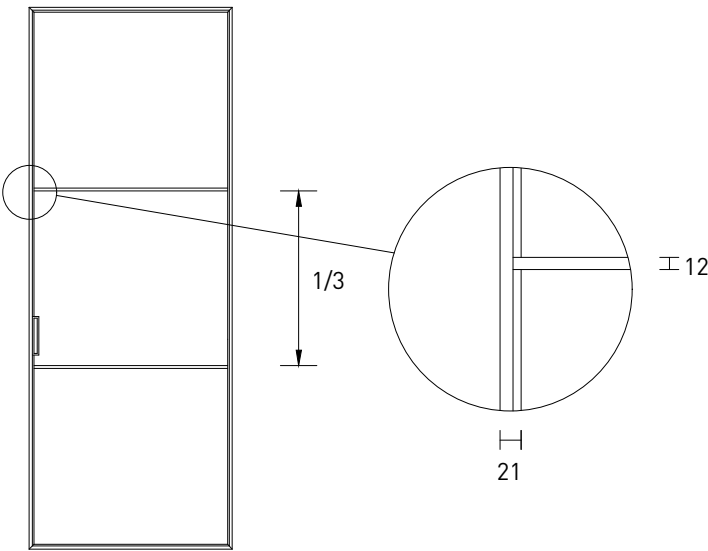

SPECIAL VERSION WITH HORIZONTAL AND VERTICAL CROSSPIECES:

The crosspieces dedicated to the Easy-S collection have a cross section of 12 x 12 mm horizontally and 10 x 8 mm vertically, they are positioned on both sides of the glass. The finish of the crosspieces is coordinated with the perimeter profiles of the door. Crossbars are not available for mirror doors. The prices shown refer only to the crosspieces, positioned as shown in the drawings (Three, Four, Six, Seven).

For any custom compositions ask for feasibility and prices to: [commerciale@stainoestaino.it](mailto:commerciale@stainoestaino.it).

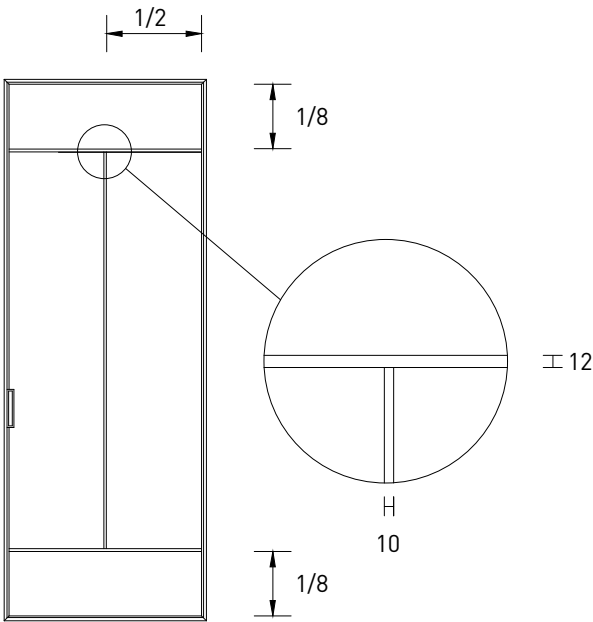

THREE VERSION

12 mm horizontal crossbars evenly spaced apart.

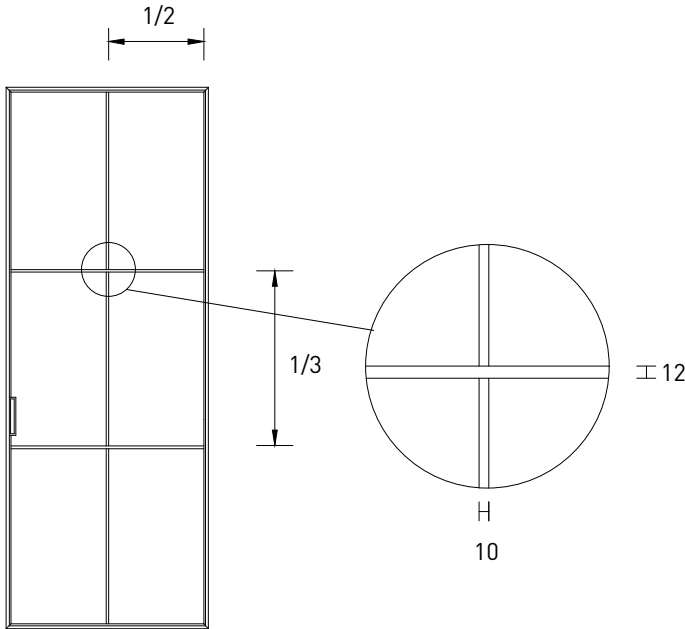

FOUR VERSION

12 mm horizontal crosspieces and 10 mm central vertical crosspiece. The crossbars are positioned according to the size of the door with the following proportions.

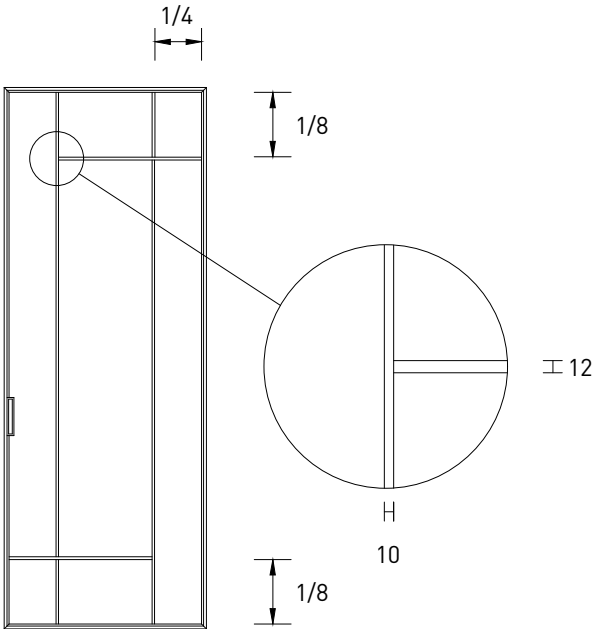

SIX VERSION

12 mm horizontal crosspieces and 10 mm central vertical cross-piece. The crossbars are spaced evenly from each other.

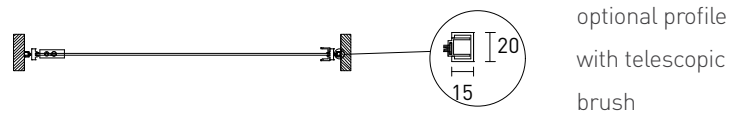

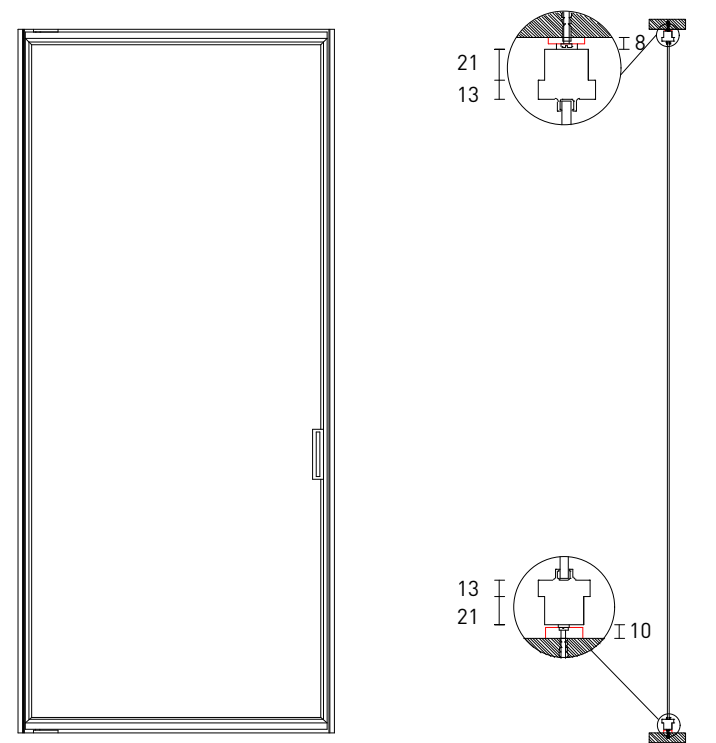

SEVEN VERSION

12 mm horizontal crosspieces and 10 mm vertical crosspieces. The crossbars are positioned according to the size of the door with the following proportions.

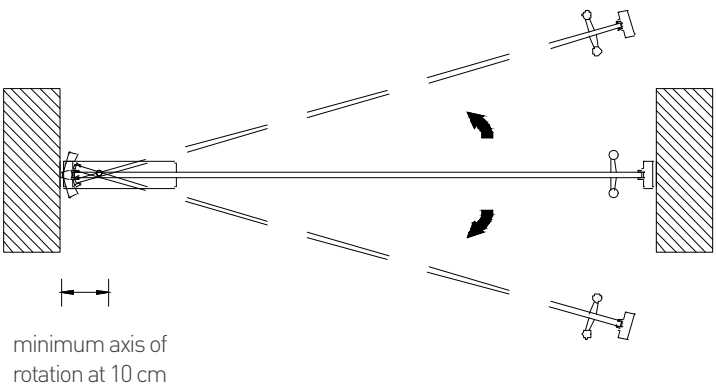

# PIVOT EASY-S

The Easy-S pivot door that separates the sleeping area from the living room is equipped with optional profiles with telescopic brushes, these thin profiles designed specifically for the Easy-S pivot doors, reduce the contact between the door and the wall, and also allow compensate for the thickness of the floor skirting.

### OPENING DETAIL

Custom-made door, passage opening dimensions up to cm 130 x 300 h, including lock with magnetic latch, floor drain and hardware embedded in the upper crosspiece, flush-fitting frame in satin silver aluminum for masonry walls.

### PAINTED GLASSES AND MIRRORS:

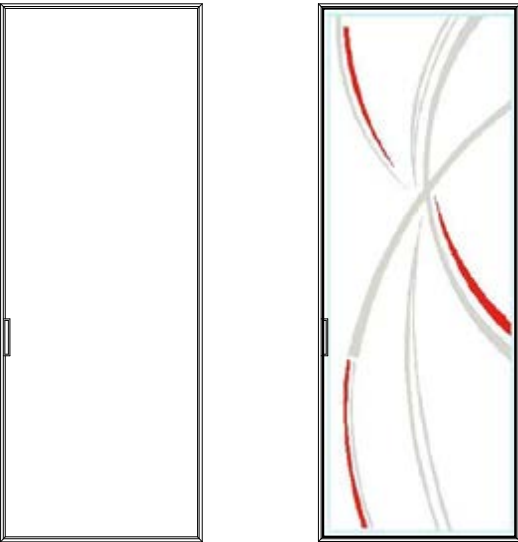

**CR:** Glass **SP:** Mirror **DV:** Painted decoration

- CR01** Laminated glass 6/7 mm
- CR03** Laminated white milk 6/7 mm
- CR05** Laminated clear fumé 6/7 mm
- CR02** Laminated neutral etched 6/7 mm
- CR09** Transparent bronze tempered 6 mm
- SP01, 02, 03** Silver/bronze/fumé mirror 1 lato coupled to a white panel on the other side

- CR06** Tempered frosted fumé 6 mm
- CR07** Tempered frosted extra white 6 mm
- CR08** Tempered frosted bronze 6 mm
- CR10** Tempered reflective fumé clear 6 mm

- DS** Laminated neutral sandblasted glass 6/7 mm

Pivot doors

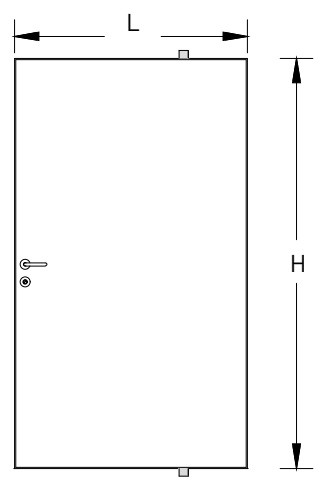

### OPTIONAL ALUMINUM FINISHES:

- **PA 02** white matt
- **PA 03** black matt
- **PA 05** bronze
- **PA 06** titanium
- **PA 09** corten
- **PA 10** dark bronze
- **PA 07** white oak
- **Matt Ral** sample
- Protective film for finishing wall frame

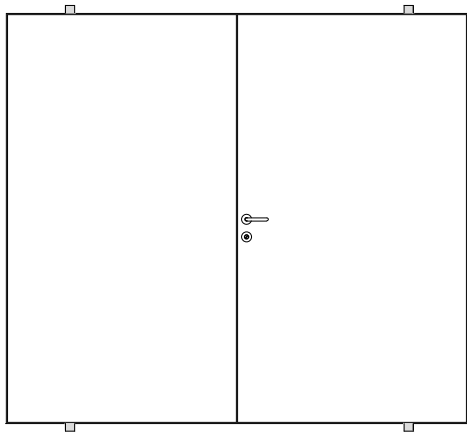

The finishes are visible on this technical sheet from page 42 to page 51.  
For customized finishes, request a quote from our technical office.

VARIATIONS FOR PIVOT DOORS:

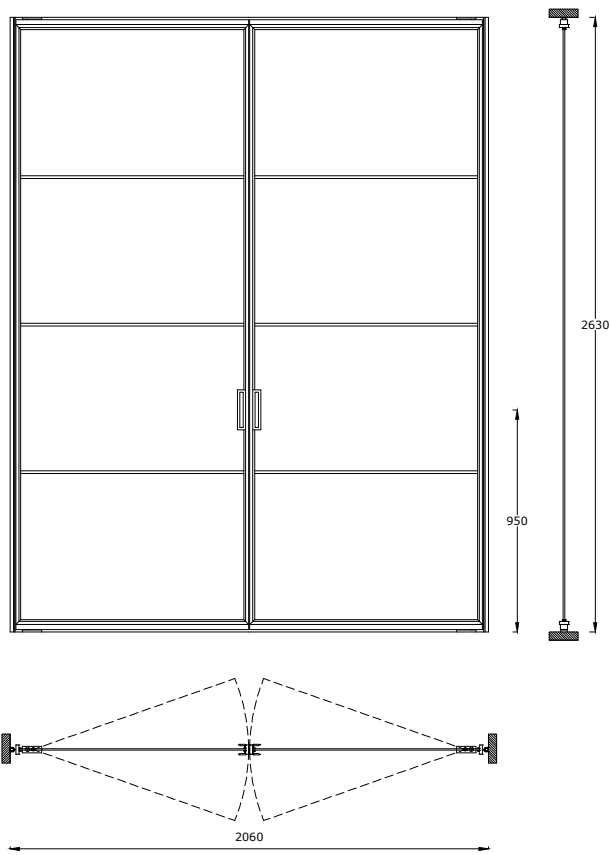

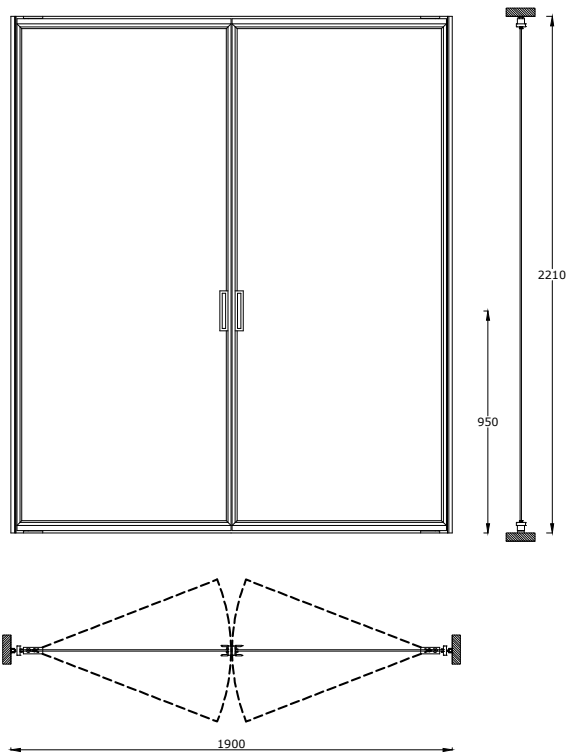

TAILORED DOORS

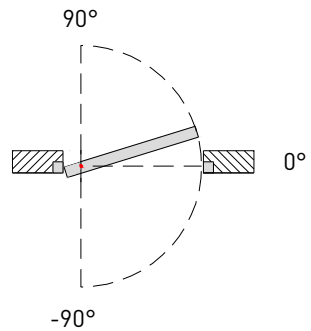

DOUBLE PIVOT DOORS

SOME EXAMPLES OF PIVOT DOORS WITH TWO SYMMETRICAL LEAVES:

**INTEGRATED DOOR STOP AS STANDARD:**

Door closer for pivot leaf with invisible rotation pin.  
This door closer is integrated into the door, it is not mandatory to provide the upper crosspiece of the frame.  
Stop positions at 0 °, 90 ° and -90 °.  
Adjustable closing and opening cushioning.

DATA  
SHEETS

handles

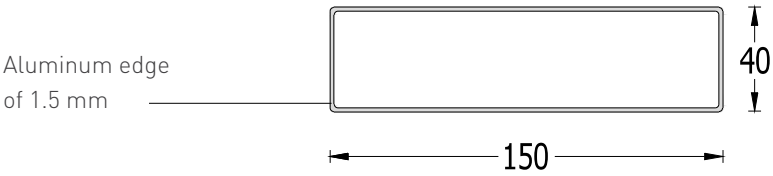

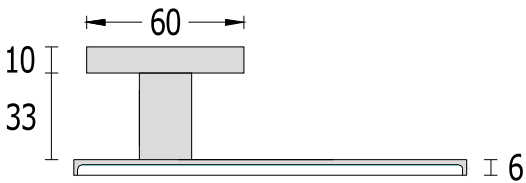

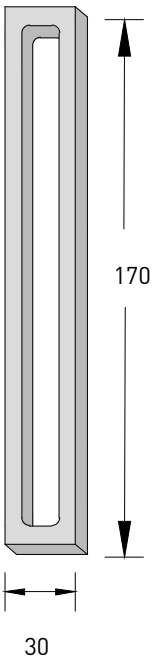

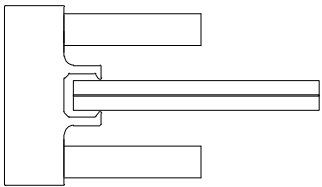

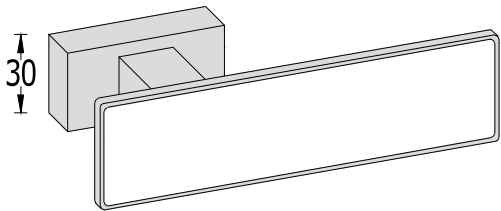

RECTANGULAR  
HANDLE  
MA17

The MA 17 handle is available in all the materials provided for the door. Rectangular 30 x 170 mm H.

REVOLUTION  
HANDLE

Revolution handle in billet aluminum, in a finish coordinated with the door profiles.

- solid aluminum handle, without insert
- handle with matt lacquered MDF insert
- handle with insert in glossy or satin washed glass
- privacy latch in satin or glossy chrome

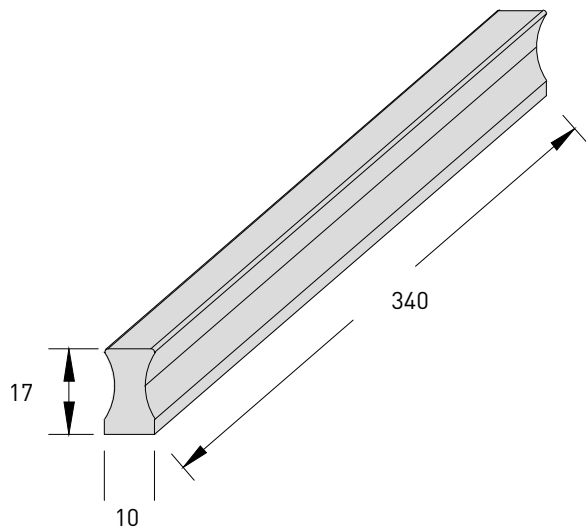

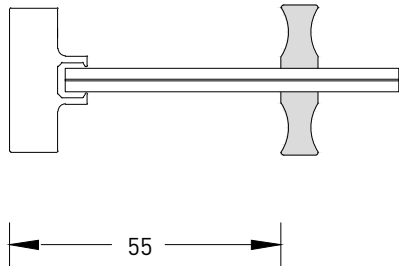

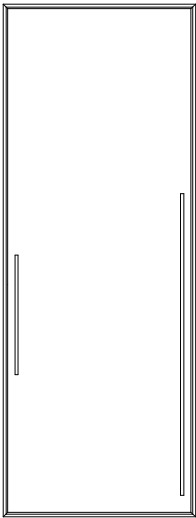

# ALUMINUM HANDLE

MA07

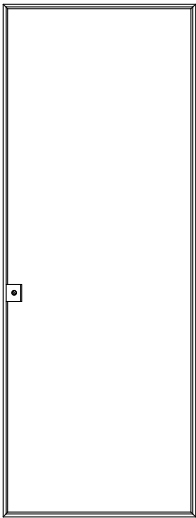

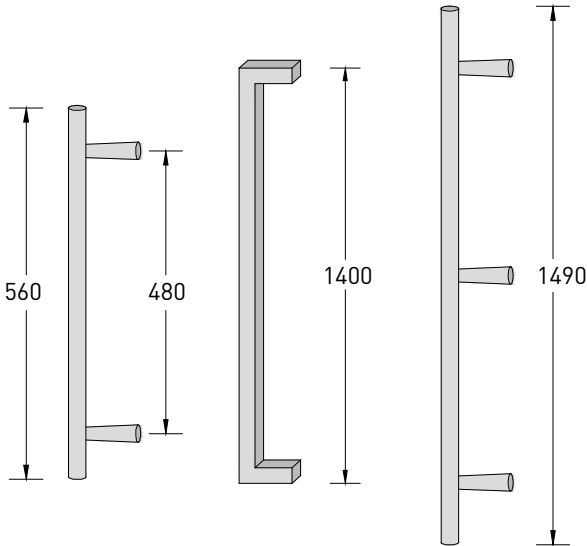

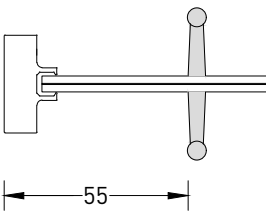

The handles available on this page provide for the elimination of the lock and the assembly of a magnet on the stop.

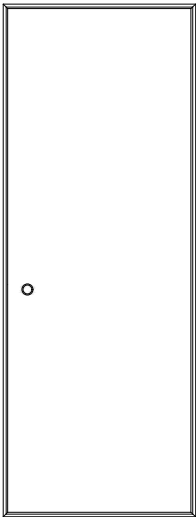

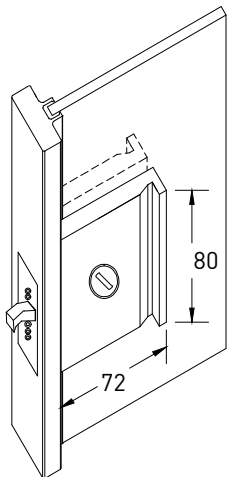

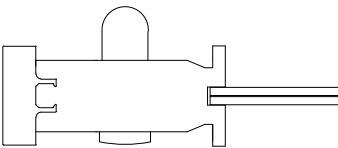

## OPTIONAL HANDLES IN VARIATION:

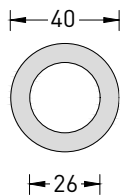

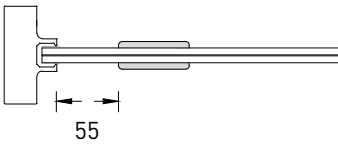

- Pair of aluminum handles H 560 mm **MA05**
- Pair of satin stainless steel handles H cm 149 **MA06**
- Pair of handles in stainless steel H 140 cm **MA04**  
(Available only on tempered glass)

Handle machined from solid aluminum with integrated lock, includes privacy latch.  
It is supplied in a finish coordinated with the perimeter profiles of the door.  
The privacy latch is available in satin chrome, polished chrome or lacquered in matt white or black.  
Available only on tempered glass.  
The use of the wall upright for lock striker is mandatory.

Ring with through hole for sliding ø mm 40 **MA20**  
Available only on tempered glass.
